Profile

A passionate and detail-oriented professional currently working as a Fiber Design Engineer, with hands-on experience in design and coordination. Alongside, I have built a strong foundation in AWS and DevOps, including cloud computing, automation, and CI/CD pipelines. I am now seeking an opportunity to transition into the IT domain and apply my technical knowledge to real-world DevOps projects.

Experience

07/2025 – Present Chennai, Tamilnadu	Fiber design engineer <i>Prodapt</i> - Created fiber network designs and route plans for FTTx deployment using AutoCAD/GIS tools. Assisted in preparing and submitting permit drawings and documentation as per local authority standards.
01/2024 – 02/2024 Puducherry	IT support <i>Integra Software Services</i> - Provided technical support for hardware and software issues. Gained hands-on experience in system administration and networking. Worked with basic AWS services such as EC2, S3, and IAM.

Education

2020 – 2024	Bachelor of Engineering Electronics and Communication Engineering <i>Annamalai University - 81.5% with Distinction</i>
2019 – 2020	Class 12th <i>Lakshmi Chordia Memorial Matric. Hr. Sec. School - 61%</i>
2017 – 2018	Class 10th <i>Lakshmi Chordia Memorial Matric. Hr. Sec. School - 71%</i>

Skills

Technical Skills — AWS - EC2, IAM, S3, VPC, RDS, Cloud watch | **Devops** - CI/CD ,Git, GitHub, GitHub Actions, Jenkins, Terraform, Docker, Basics of Kubernetes | Basics of **Python** | Fundamentals of **Networking** | Linux, Infrastructure as code (Iac) | Microsoft office (Word, Excel, Powerpoint)

Soft Skills — Strong attention to detail and accuracy | Willingness to learn new tools and technologies | Effective time management and adaptability | Problem-solving and analytical thinking

Projects

Cloud-Based CI/CD Java Application Deployment
Developed and deployed a containerized Java web application using Docker, GitHub Actions, and Terraform. Implemented CI/CD automation for building, testing, and deploying the application on a cloud-based infrastructure, integrating version control and infrastructure-as-code practices.

Design and Verification of APB Protocol Using UVM
Designed and verified the APB protocol using Universal Verification Methodology (UVM) during my final year project. Built a complete testbench with sequencer, driver, and monitor to ensure protocol functionality. Gained hands-on experience in digital design and functional verification.

Courses

AWS and DEVOPS
Br Technology
The AWS and DevOps course covers cloud infrastructure, automation, and CI/CD practices using tools like Git, Jenkins, Docker, Kubernetes, Ansible, and Terraform. It provides hands-on training in AWS services, cloud deployment, and infrastructure as code, preparing learners to manage and automate scalable cloud environments.
